Oct 30 1852 UTC - Fire Extinguished by the crew. Soon after clean up work initiated.

USM

Starlink

USM is one of the first ship management companies globally to implement the cutting-edge technology as business operations and crew communication tool

All UNITY vessels

have Starlink as **MAIN** communications system, backed up by VSAT and 4G.

200 mbps

100 times faster than the common VSAT system for video calls, trainings, file transfer.

Pioneering training aboard

Live training sessions across 20 vessels and over 120 officers in just three days with ships in transit and officers spread across multiple time zones.

USM

USM Proprietary Tech Solution

From broad spectrum system to **tailor-made** Unity-focused IT solution with **50% reduction of costs**

Unity IT Datacentre

- designed by Unity IT team
- installed on the newest ship in the fleet

Technical Highlights

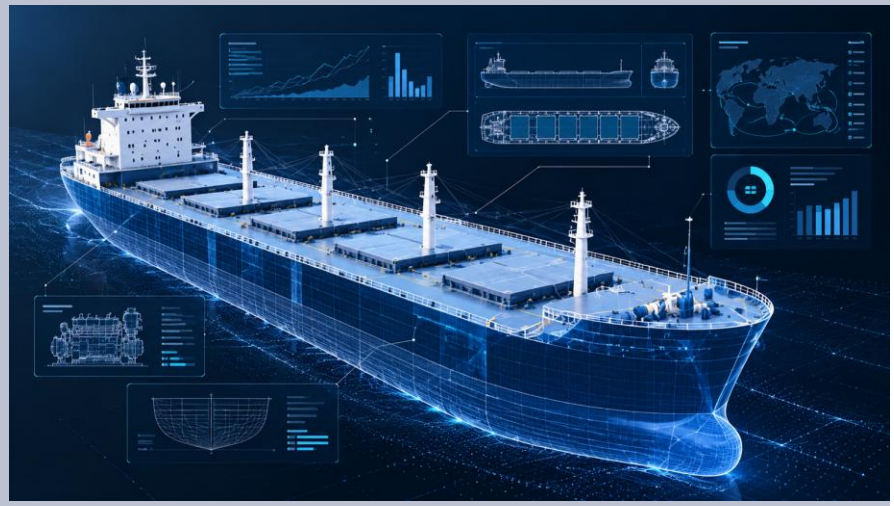

- improved core hardware
- power backed by new firewall
- full control over virtualization, firewall management, and data analysis onboard

Benefits

- enhanced tailor made system
- faster and more effective onboard IT support
- operation costs down by 50%

USM

Plans for the future

4G e-SIM solution

- Under development by Unity IT team
- Will ensure stable communications in questionable areas

Digital Twin

- The aim is to simulate a real-life ship into digital model with unlimited application potential

- Crew training
- Incident investigation
- Performance improvement
- Prediction of issues

“Never be afraid to ask questions,,
because if you never ask, the answer is always no.“
Sheena Yap Chan
