STRATEG

AI in real-world production

Oleksandr Syvak

Founder of STRATEG

CONNEXUS 2026

About 18 months to a solution

Approximate duration of the investigation

12

months

Testing suggestions from GPT and Gemini

6

months

Working with a chemist

A quick answer can lead to a lengthy investigation

STRATEG

Oleksandr Syvak

Founder of STRATEG

Ukrainian manufacturer of products for children

Creative kits

Board games

Educational games

Our own clay formulation and production

Responsibility at every stage

The packaging started to swell

Normal packaging

Swollen packaging

The clay met our requirements

Storage exposed a stability issue

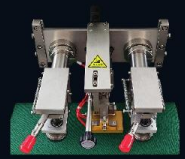

Customer confidence was at stake

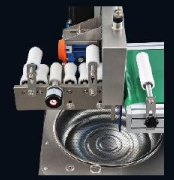

Changes to proportions and the production process

Mixing

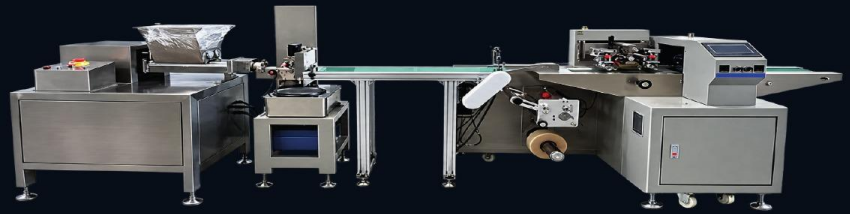

Packaging details

Packaging line

AI hypotheses and production evidence

01 → 02 → 03 → 04

Describe the problem

What changes after packaging?

Generate hypotheses

Suggestions from GPT and Gemini

Run experiments

Test each proposal in production

Review the evidence

People choose the next step

A convincing explanation still needs evidence

The time required for verification

Seconds

for an AI answer

Weeks

for a production test

or even months

New sample **New raw materials** **Staff time** **Equipment time**

And most importantly: time.

Controlled experiments

People owned the decisions

The team → Management

Conducted tests
Recorded observations
Prepared reports

Reviewed evidence
Set priorities
Authorized changes

The final decision always remained with people.

A promising hypothesis

“It doesn’t work.”

Testing. → Recording. → Analyzing.

We assumed that the formulation was missing a component

a chemist → a practical solution

Targeted changes

The original formulation remained the basis

Original formulation

01

Formulation

Added the necessary component

02

Borax preparation

Glycerin with an additional compound

03

Process parameters

Refined proportions and timing

Adjusted the preparation process

The result

Stable packaging

The clay kept its original properties

Our approach to using AI

technology →	**people** →	**data** →	**responsibility**
for speed	for experience	for verification	with us.

Thank you!
