THE IDEA

How Was LISA Bubble Created?

One day I looked at OpenWebUI and thought:
“It’s powerful... but it’s dull, slow, and not user-friendly.”

What if AI was always one click away?

- Fast Access to AI
- Engaging and User-Friendly Interface
- Available Everywhere on Your Desktop

- ✕ Dull Interface
- ✕ Too Many Clicks
- ✕ Slow to Access

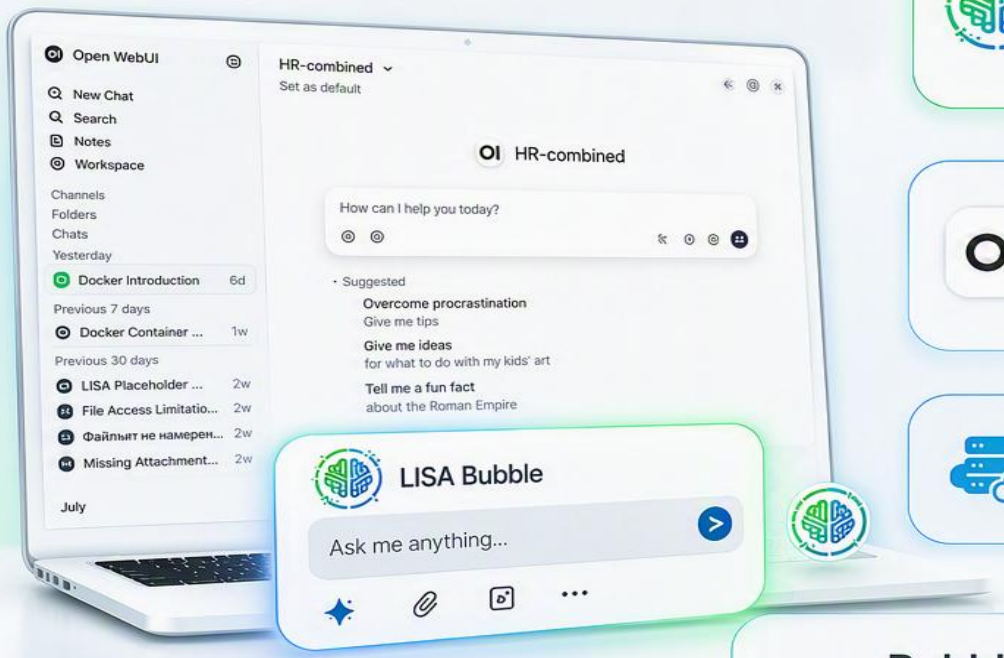

AI Where You Work.

LISA Bubble

AI Assistant for your Business

LISA Bubble is your assistance for your everyday work.

LISA Bubble
Desktop productivity layer

- Quick Actions
- Files & Drag & Drop
- Fast Access
- Desktop UX

OpenWebUI
AI workspace

- Models
- Assistants
- Chats & History
- Files

Corporate AI
Existing infrastructure

No new AI backend
We use the existing infrastructure.

No duplication
Based on models and infrastructure.

Uses existing models and assistants
As in OpenWebUI.

Corporate environment security
Secure, controlled, transparent.

Bubble doesn't create a new AI silo.
It uses what we already have.

LISA Bubble

AI Assistance for your Business

BUSINESS VALUE

More productivity. Real business impact.

LISA Bubble brings AI closer to the business — without creating another AI platform.

Higher productivity

Faster access to AI with fewer clicks and less context switching.

Better adoption

An intuitive desktop interface makes AI easier and more natural to use.

Uses existing infrastructure

Builds on our current OpenWebUI environment, models and capabilities.

Security & control

Keeps the AI experience within the organization's existing security and governance framework.

Scalable foundation

Provides a flexible interface that can evolve as our AI capabilities grow.

LISA Bubble turns existing AI capabilities into an accessible, secure and practical part of everyday business work.
